## **To prepare for the City of Rialto detour for State Route 210 Construction...**

**...Improvements have begun at the intersection of Riverside and  
Baseline to improve traffic flow once drivers are diverted from  
Easton and Highland early next year**

Yeager-Skanska Construction has begun work that will restrict the middle travel lanes in each direction on Baseline just west of Riverside Avenue for the next two weeks. Crews will reconstruct the median on Baseline and create a new entrance to the Albertson's center further west. During the construction cars traveling west on Baseline will not be able to turn left into the shopping center near the Baseline/ Riverside intersection. In addition, cars traveling east will not be allowed to turn left onto Riverside.

Drivers should use either Cactus or Acacia to access Highland Avenue during the construction period. As part of these improvements, a new entrance to the shopping center will be added west of the current entrance on Baseline.

In addition to improving the left turn lane from Baseline onto Riverside, the existing bus stop on Riverside north of Baseline will be moved further north, and a bus cut-out will be added to the outside northbound lane. This will allow buses to pick up riders without affecting the flow of traffic.

All of this work is part of ongoing Rialto detour road improvements designed to improve traffic flow while the freeway is being built along Highland Avenue.

Remember during construction, **Safety: It's no accident**
